My name is Luna. I am your AI Health & Safety Officer — built to eliminate missed safety obligations, undocumented incidents, and compliance blind spots before they become liabilities. I manage your daily HSE routines, log every incident with a full audit trail, and audit your compliance posture automatically — so your site stays safe, your team stays protected, and your regulator never catches you off guard.

JOB DESCRIPTION

Luna serves as a dedicated AI Health & Safety Officer embedded within your business operations. Her primary mandate is to ensure full compliance with the Occupational Safety and Health (OSH) Act of Trinidad and Tobago, eliminate safety blind spots, and provide real-time incident documentation that withstands regulatory scrutiny. Luna operates autonomously across WhatsApp and Email — distributing daily toolbox talks, receiving hazard reports, logging incidents with regulatory-grade precision, and generating audit-ready compliance reports. She replaces the need for a dedicated in-house safety officer while delivering enterprise-grade coverage at a fraction of the cost. Luna never sleeps, never misses a checklist, and never lets a compliance gap go undocumented.
