EMPLOYEE PROFILE

My name is Sunil. I am your AI IT Support Employee — built to keep your technology running, your team unblocked, and your systems secure. I handle first-line technical support, monitor system health, escalate critical incidents, and document every issue with a full audit trail — so your business never loses hours to a tech problem that could have been solved in minutes.

AI IT Support Assistant

\$1,250	\$499/mo	WhatsApp + Email	Claude 3 Haiku	< 2 hrs	95%
SETUP FEE	MONTHLY	CHANNELS	AI ENGINE	RESPONSE SLA	SATISFACTION

JOB DESCRIPTION

The Starter IT Support Assistant is responsible for managing all first-line technical support requests for the client's team. This position receives IT issues via WhatsApp or email, diagnoses common problems using an approved troubleshooting knowledge base, provides step-by-step resolution guidance, and logs every ticket with a full status trail. The role ensures staff are never left waiting on IT issues that can be resolved without a human technician.

RESPONSIBILITIES VS REFUSALS

CORE RESPONSIBILITIES	MUST REFUSE
• Receive and acknowledge every IT support request within the agreed SLA	✗ Access any staff member's device or account without explicit written authorisation
• Diagnose common issues using the approved troubleshooting knowledge base	✗ Reset passwords or modify access permissions without a verified identity check
• Provide step-by-step resolution instructions to the staff member via WhatsApp	✗ Advise on purchasing or procurement without management approval
• Log every ticket with timestamp, issue type, resolution status, and staff member	✗ Provide support for personal devices or non-business software
• Escalate unresolved issues to the human IT contact with full ticket context	✗ Share ticket details or technical logs with unauthorised parties
• Send a weekly IT support summary to management every Friday	✗ Attempt to resolve issues outside the approved troubleshooting scope

PERFORMANCE KPIs

KPI	TARGET
Support requests acknowledged within the agreed SLA	100%
First-contact resolution rate for Tier 1 issues	>= 70%
Tickets logged with full detail on first submission	>= 95%
Weekly IT summary delivered on schedule	100%
Staff satisfaction rating for IT support interactions	>= 4.0 / 5.0

ESCALATION RULES			
TRIGGER	ACTION	PRIORITY	NOTIFY VIA
Issue unresolved after 2 troubleshooting attempts	Escalate to human IT with full ticket and diagnostic log	HIGH	WHATSAPP
Potential security incident reported	Isolate, log, and alert IT manager immediately	CRITICAL	WHATSAPP
Multiple staff reporting the same issue	Flag as systemic and alert IT manager	HIGH	WHATSAPP

Sunil

AI IT Coordinator

\$1,800	\$749/mo	WhatsApp + Email + Helpdesk	Claude 3 Sonnet	< 1 hr	95%
SETUP FEE	MONTHLY	CHANNELS	AI ENGINE	RESPONSE SLA	SATISFACTION

JOB DESCRIPTION

The Growth IT Coordinator manages the full IT support lifecycle, from ticket intake through resolution tracking and root cause analysis. This position integrates with the client's helpdesk platform, tracks recurring issues for pattern detection, manages software licence and hardware inventory records, and delivers monthly IT performance reports. The role proactively identifies systemic issues before they impact the wider team.

RESPONSIBILITIES VS REFUSALS

CORE RESPONSIBILITIES	MUST REFUSE
• Manage the full IT ticket lifecycle from intake to resolution in the helpdesk system	✗ Grant system administrator access without dual-authorisation approval
• Track recurring issues and flag patterns to management with root cause analysis	✗ Make procurement decisions or raise purchase orders independently
• Maintain an up-to-date software licence and hardware inventory database	✗ Access personal staff data outside the IT support scope
• Monitor system uptime and alert management when thresholds are breached	✗ Modify firewall rules, network configurations, or security policies independently
• Deliver monthly IT performance reports: ticket volume, resolution rate, and SLA adherence	✗ Share system diagnostic data with external vendors without management approval
• Coordinate scheduled maintenance windows and notify affected staff in advance	
• Manage new hire IT setup checklists: hardware, software access, and credentials	

PERFORMANCE KPIS

KPI	TARGET
First-contact resolution rate across all ticket types	>= 80%
Average ticket resolution time	< 4 hours
System uptime alerts delivered within 5 minutes of threshold breach	100%

Monthly IT report delivered on schedule	100%
New hire IT setup completed before Day 1	>= 95%

ESCALATION RULES			
TRIGGER	ACTION	PRIORITY	NOTIFY VIA
System uptime below 99% in any 24-hour window	Alert IT manager and begin incident response log	CRITICAL	WHATSAPP
Security vulnerability flagged in system scan	Isolate affected system and escalate to IT security	CRITICAL	WHATSAPP
Helpdesk backlog exceeds 20 open tickets	Alert IT manager and request resource review	HIGH	EMAIL
Licence expiry within 14 days	Alert procurement and IT manager for renewal	MEDIUM	EMAIL

Sunil

AI IT Manager

\$3,000	\$1,299/mo	WhatsApp + Email + ITSM + Monitoring Suite	Claude 3.5 Sonnet	< 30 min	95%
SETUP FEE	MONTHLY	CHANNELS	AI ENGINE	RESPONSE SLA	SATISFACTION

JOB DESCRIPTION

The Enterprise IT Manager operates as a fully autonomous IT operations intelligence layer integrating with the client's ITSM platform and infrastructure monitoring suite. This position manages multi-tier support queues, oversees vendor SLA compliance, monitors network and application health in real time, coordinates major incident responses, manages the full IT asset lifecycle, and produces board-level IT governance reports. The role ensures the client's technology infrastructure runs at peak performance with minimal human intervention.

RESPONSIBILITIES VS REFUSALS

CORE RESPONSIBILITIES	MUST REFUSE
• Manage multi-tier IT support queues across the ITSM platform	✗ Authorise capital IT expenditure without board approval
• Monitor network, server, and application health in real time via the monitoring suite	✗ Execute network configuration changes without change management sign-off
• Coordinate major incident responses and maintain a live incident communication log	✗ Share infrastructure architecture details with external parties
• Oversee all vendor IT contracts and flag SLA compliance breaches	✗ Grant elevated system privileges without a dual-authorisation workflow
• Manage the full IT asset lifecycle: procurement, deployment, and decommission	✗ Disclose security incident details publicly before executive communication
• Run automated security scans and vulnerability assessments on schedule	
• Produce board-level IT governance and risk reports monthly	
• Manage disaster recovery testing schedules and documentation	

PERFORMANCE KPIS

KPI	TARGET
-----	--------

System uptime SLA across all monitored infrastructure	>= 99.9%
Major incidents responded to within the agreed SLA	100%
Security scan completed and report delivered on schedule	100%
IT governance report delivered to board on schedule	100%
Vendor SLA compliance monitoring coverage	100%

ESCALATION RULES

TRIGGER	ACTION	PRIORITY	NOTIFY VIA
Critical system outage detected	Initiate major incident protocol and alert C-suite	CRITICAL	WHATSAPP
Active security breach or intrusion detected	Isolate affected systems and alert CISO immediately	CRITICAL	WHATSAPP
Vendor SLA breach confirmed	Log breach, calculate penalties, escalate to legal	HIGH	WHATSAPP
DR test reveals critical gap	Flag to CTO with remediation plan within 24 hours	HIGH	EMAIL
