

Sunil

AI IT Support Officer

AI Workforce Division · Information Technology Operations

Available Across Industries | WhatsApp · Email · Dashboard · API

FUNCTIONAL IDENTITY

Sunil is a fully AI-driven IT Support Officer — purpose-built for Caribbean businesses that cannot afford or retain dedicated IT staff. He handles help desk requests, tracks assets, broadcasts security awareness, monitors systems 24/7, and escalates critical incidents outside business hours.

AI MODEL PER TIER

- Starter: Claude Haiku
- Growth: Claude Sonnet
- Enterprise: Claude Sonnet 3.5

CARIBBEAN IT CONTEXT

2,582 cyberattacks per week — 40% above global average.

1.3 million cybersecurity personnel shortage across the region.

60% of Caribbean businesses delayed on digital transformation.

Most SMEs have zero IT coverage after 5 PM.

ETHICS & COMPLIANCE

- Caribbean legal compliance layer enforced
- Human approval required for all system changes
- Full audit trail on every action
- Data never shared cross-agent

PACKAGE TIERS

STARTER

Starter

Setup: US\$1,250

Monthly: US\$599

[WhatsApp](#)

Sunil handles all incoming IT queries, logs every ticket, and onboards new users — giving your team a consistent, professional IT response without hiring anyone.

- IT ticket logging and categorisation — every request captured and tracked
- New user IT onboarding — account setup, access provisioning, device guidance
- Password reset and account unlock support via WhatsApp
- Weekly IT summary report — tickets opened, resolved, and pending
- First-response to all IT queries within seconds — 24/7

Best For: Small businesses with no dedicated IT staff.

GROWTH

Growth

Setup: US\$2,000

Monthly: US\$899

WhatsApp · Email · Dashboard

Sunil's Help Desk Agent skill activates — giving your team fully conversational IT support, automated security broadcasts, and complete asset and licence management.

- Everything in Starter — plus conversational Help Desk Agent activates
- Step-by-step WhatsApp troubleshooting — guided issue resolution without IT staff
- IT asset register — hardware, software, and assigned users tracked
- Licence and subscription renewal alerts — flagged 30 days before expiry
- Cybersecurity Awareness Broadcasting — weekly phishing alerts and security notices sent to all staff via WhatsApp (AI-generated, pre-approved templates)
- Monthly IT activity report — tickets opened, resolved, and pending

Best For: Growing businesses managing IT across remote or multi-location teams.

ENTERPRISE

Enterprise

Setup: US\$4,000

Monthly: US\$1,499

WhatsApp · Email · Dashboard · API

The full AI IT department — Sunil manages your complete technology support layer from help desk to 24/7 proactive system monitoring, with all three skill modules active.

- Everything in Growth — plus Data Integrity Officer and Systems Monitor activate
- Scheduled data integrity checks across Google Sheets, Supabase, or connected databases
- Detect and flag duplicate records, missing required fields, and format violations
- 24/7 system uptime and performance surveillance — real-time latency and downtime alerts
- After-Hours Critical Incident Escalation — logs, classifies, and escalates incidents outside business hours so no issue waits until morning
- Bi-weekly Data Integrity Report and monthly IT performance scorecard

Best For: Companies where system uptime and data accuracy are mission-critical.

VERIFIED AI CAPABILITIES

Every responsibility on this resume is executable by Claude AI — no fabrication, no human substitution needed.

Claude API	Ticket triage, troubleshooting guidance, security alert drafting, report generation
Make.com / n8n	Automated message routing, scheduled integrity checks, broadcasting workflows
Supabase / Sheets	Asset register, licence date tracking, duplicate detection, data validation
WhatsApp API	Staff notifications, after-hours escalation, real-time incident alerts
